Board's Decision in Respect of Procedural or Jurisdictional Matters:

[1] No procedural or jurisdictional matters were raised. The Board proceeded to hear the merits of the complaint.

Property Description:

[2] The subject property is a single tenant C quality warehouse consisting of 19,580 square feet (sq. ft.), with 17% finish, 28.52% site coverage and constructed in 1974. This property is located in Foothills Industrial Park, has 1.58 acres of land, with a land use designation (LUD) of Industrial-General (I-G). This property been assessed taking into account 0.08 acres of extra land. The subject property is assessed at \$131.57/ sq. ft. arrived at through the Sales Comparison Approach to Value and has an assessed value of \$2,570,000.

Issues:

[3] The 2013 assessment value is greater than the market value as of July 1, 2012 and is inequitable in relation to assessment values of similar properties, \$103/ sq. ft. would produce a better market value for this property.

Complainant's Requested Value: \$2,016,000

Board's Decision:

[4] The Assessment is confirmed at the value of \$2,570,000

Legislative Authority, Requirements and Considerations:

[5] The Municipal Government Act, Section 460.1(2), subject to Section 460(11), a composite assessment review board has jurisdiction to hear complaints about any matter referred to in Section 460(5) that is shown on an assessment notice for property, other than property described in Subsection 460 (1)(a).

Position of the Parties**Complainant's Position:**

[6] The Complainant's stated that the subject property's assessed \$131.57/ sq. ft. is higher than the price per square foot of sales of comparable properties in this area.

[7] The Complainant produced two sales comparables with a median time adjusted sale price per sq. ft. of \$103.20/ sq. ft. The two sales were of C and C- warehouses, in the south east region of the City [pg.13, C-1]. RealNet and Assessment documents were provided on the sale properties.

[8] The Complainant included the 2013 assessed values for the sale properties and calculated an Assessment to Sale Ratio (ASR) for each of them. The Complainant stated that the resulting range of ASR's from 1.00 to 1.09 and the low assessment rates/ sq. ft of 102.66 and \$112.73 support the request to lower this properties assessed value.

Respondent's Position:

[9] The Respondent spoke to the Complainant's sales evidence [pg 13, R-1] reviewing each comparable based on how equitable the properties were to the subject. It was noted that both the comparable properties had smaller parcel size, far less finish and close to double the site coverage. The Respondent stated that this would account for the differences in the resulting rates.

[10] The Respondent provided evidence of three warehouse sales in the south east area of the city [pg. 15, R-1] to show that the typical values/ sq. ft. used by the City were reasonable for the subject property. The Respondent stated for assessment purposes the task was to assess all similar properties at a similar value. This requires analysis of all the sales within the group of similar properties to arrive at a typical value per sq. ft. and not to just reflect one or two sale prices. Further the Respondent went on to say that the subject property's value should fall within the range of probable selling prices within that group, and the subject property does fall within that range.

[11] The Respondent went through the three warehouse sales it provided, indicating how the subject fit in within the components that were deemed contributing factors to the final value. Those components were Building Type, Parcel Size, Land Use Designation, Assessable Building Area, Year of Construction, Non-Residential Zone, percent of Finish, Site Coverage, and Excess/Additional Land. While there were a number of differences noted between the subject property and the sales comparables, the Respondent noted the subject property was in fact at a lower rate per square foot than all three sales of reasonably similar properties. The Respondent also pointed out that two of its sales had similar site coverage when compared to the subject and they supported a median assessment of \$131.57/ sq. ft.

[12] The Respondent's time adjusted sale price/ sq. ft. ranged from \$134.15 to \$149.99 with a median of \$148/ sq. ft. The subject being assessed at \$131.57. A time adjustment graph was also provided to show any adjustments to the sale prices.

[13] Four equity comparables were also put into evidence by the Respondent showing that the subject property was assessed equitable to similar properties. The subject's \$131.57 rate /sq. ft was compared to the median of the four comparables which was \$133.20/ sq. ft.

Board's Reasons for Decision:

[14] The Board reviewed all the comparable sale information provided as evidence by both the Complainant and Respondent. Upon review of all the comparable sales, the Board paid particular attention to the properties deemed most comparable to the subject, as indicated by the Complainant and Respondent

[15] The Board concluded that a great deal of the sale evidence relied upon the time adjusted sale price being correct, however there was nothing in the Complainant's evidence to indicate how the time adjustments were arrived at, except by way of the Complainant's explanation that the price increase over time. The Complainant stated that sales were reviewed and a factor was developed to quantify the time adjustment. The Respondent provided time adjustment information in the evidence package but didn't speak to it.

[16] Little evidence was presented by either party on the difference in value attributed to factors such as Multi vs. Single Tenanted Warehouses, Site Coverage, location of sales in different industrial parks and percent of Finish on the sale property improvements when compared to the subject improvement. The Respondent gave good evidence of how the low site coverage affects the value and the resulting adjustments made to account for this resulted in support for the subject property value.

[17] The Board gave consideration to the equity comparables produced by the Respondent which showed the subject property's rate/ sq. ft. within the range of values of similar properties.

[18] The Board found the Complainant did not provide sufficient evidence to warrant changing the assessed value.

DATED AT THE CITY OF CALGARY THIS 9th DAY OF September, 2013.
