PROCEDURAL MATTERS

Upon questioning by the Presiding Officer, the parties indicated no objection to the composition of the Board. In addition, the Board members indicated no bias with respect to the file.

All parties giving evidence during the proceedings were sworn by the Board Officer.

PRELIMINARY MATTERS

The parties agreed that all evidence, submissions and argument on Roll # 8480097 would be carried forward to this file to the extent that matters were relevant to this file. In particular, the Complainant chose not to pursue arguments with respect to the evidence he had provided regarding the income approach to value.

The Complainant and the Respondent presented to the Board differing time adjustment figures for industrial warehouses based on the Complainant's submission that some data used in the preparation of the Respondent's time adjustment model was faulty. The Board reviewed the data from the Complainant used in the preparation of his time adjustment figures and was of the opinion that the data used was somewhat questionable (Exhibit C-2). In any event, the differences between the time adjustment charts used by the parties for industrial warehouses were small and in many cases of little significance. Therefore, the Board has accepted the time adjustment figures used by the Respondent.

BACKGROUND

The subject property is a medium warehouse built in 1998 and located in the Alberta Park Industrial subdivision of the City of Edmonton. The property has a total building area of 32,251 square feet with site coverage of 25%.

ISSUES

The Complainant had attached a schedule listing numerous issues to the complaint form. However, most of those issues had been abandoned and the issue left to be decided was as follows:

- Should the subject property receive a 10 % adjustment for perpendicular configuration?

LEGISLATION

The Municipal Government Act, R.S.A. 2000, c. M-26;

s.467(1) An assessment review board may, with respect to any matter referred to in section 460(5), make a change to an assessment roll or tax roll or decide that no change is required.

s.467(3) An assessment review board must not alter any assessment that is fair and equitable, taking into consideration

- a) the valuation and other standards set out in the regulations,*
- b) the procedures set out in the regulations, and*
- c) the assessments of similar property or businesses in the same municipality.*

POSITION OF THE COMPLAINANT

The Complainant argued that the subject property is disadvantaged due to the "L" shape of the building. Portions of the building do not have exposure to the avenue. The subject is designed as a multi-tenant building and therefore should receive the 10 % adjustment, as per the City's current assessment practice.

POSITION OF THE RESPONDENT

The Respondent argued that the subject is a single tenant building and is not disadvantaged by lack of exposure.

The Respondent further argued that the practice of adjusting for configuration or building being perpendicular to the frontage is only applied to multi-tenant buildings, as some tenants in a multi-tenant building may be affected by the configuration.

DECISION

The decision of the Board is to confirm the current assessment at \$4,212,500.

REASONS FOR THE DECISION

The Board is of the opinion that the current policy of adjusting for configuration is followed in a fair and equitable manner.

Further, no evidence was presented to support a disadvantage to the subject property.

DISSENTING OPINION AND REASONS

There was no dissenting opinion.

Dated this 4th day of November, 2010, at the City of Edmonton, in the Province of Alberta.

Presiding Officer

This Decision may be appealed to the Court of Queen's Bench on a question of law or jurisdiction, pursuant to Section 470(1) of the Municipal Government Act, R.S.A. 2000, c.M-26.
