

## **Edmonton Composite Assessment Review Board**

**Citation: Altus Group v The City of Edmonton, 2013 ECARB 00964**

**Assessment Roll Number:** 10068889

**Municipal Address:** 9499 137 Avenue NW

**Assessment Year:** 2013

**Assessment Type:** Annual New

Between:

**Altus Group**

Complainant

and

**The City of Edmonton, Assessment and Taxation Branch**

Respondent

---

### **DECISION OF**

**Jerry Krysa, Presiding Officer**

**James Wall, Board Member**

**Randy Townsend, Board Member**

---

### **Procedural Matters**

[1] The parties to the complaint indicated that they have no objection to the composition of the Board, and the members of the Board declared no bias in the matter of this complaint.

### **Preliminary Matters**

[2] At the commencement of the hearing the parties advised the Board that as a result of pre-hearing negotiations, the Respondent will concede to the Complainant's issues in respect of specific leasable areas within the improvement and the corresponding market rent rates. As a result of these changes, the Respondent proposes a revised assessment in the amount of \$99,003,500. In turn, the Complainant will abandon all other issues with the exception of the issue set out in paragraph 5 below.

[3] In accordance with the parties' request, the Board will consider the evidence and argument presented in respect of the Complainant's remaining issue at the earlier hearing of the complaint filed in respect of tax roll number 6690994, in this matter without further mention.

### **Background**

[4] The subject property is a 28.122 acre parcel of land, improved with a neighbourhood shopping centre development known as Northgate Centre. The improvement, originally constructed in 1973 and expanded in subsequent years, contains a total leasable area of 489,198 square feet, plus significant interior common areas. The subject has been assessed by means of the income approach to value at \$110,336,000.

## **Issue**

- [5] Is the assessment of the subject property equitable in relation to the assessments of other retail properties?

## **Legislation**

The *Municipal Government Act*, RSA 2000, c M-26, reads:

- [6] **1(1)(n)** “market value” means the amount that a property, as defined in section 284(1)(r), might be expected to realize if it is sold on the open market by a willing seller to a willing buyer;

**467(1)** An assessment review board may, with respect to any matter referred to in section 460(5), make a change to an assessment roll or tax roll or decide that no change is required.

**467(3)** An assessment review board must not alter any assessment that is fair and equitable, taking into consideration

- (a) the valuation and other standards set out in the regulations,
- (b) the procedures set out in the regulations, and
- (c) the assessments of similar property or businesses in the same municipality.

## **Summary of Parties' Positions**

[7] The Complainant argues that the assessment of the subject property is not fair and equitable with similar retail properties that are assessed at 95% of their actual value. The Complainant submits that the Respondent has stratified similar retail properties into two separate groups, and the assessments for the two groups of properties are prepared inconsistently by different valuation groups (assessors); with the result that one group of properties stratified as “Retail”, is assessed preferentially in relation to the other group, “Shopping Centres”, to which the subject belongs.

[8] The Complainant submits that the assessment of the subject property is founded on 100% of the net leasable area of the improvement as indicated on the subject's rent roll. The Complainant argues that in contrast, the assessments of similar properties stratified as Retail are based on 95% of the leasable size of the property, resulting in assessments that reflect 95% of the actual value of the properties. The Complainant maintains that to be equitable, the subject's net leasable areas should be adjusted by -5%, resulting in a total assessment of \$94,074,000.

[9] In support of the argument, the Complainant provided a summary of 92 Retail properties to demonstrate that the leasable areas assessed by the Respondent reflect, on average, 94% of the total leasable area indicated on the properties' rent rolls; with a corresponding median ratio of 95%. The summary also demonstrates that the leasable areas assessed by the Respondent reflect, on average, 92% of the gross building size indicated on the Respondent's records, with a corresponding median ratio of 94% (Exhibit C2, pp.1-2). Supporting documentation of each of the properties' rent rolls and assessed areas was provided (C2, pp.3-438).

[10] The Complainant further provided two of the Respondent's valuation reports for each of three properties that were inadvertently assessed by both valuation groups in 2012, to demonstrate the following variance in assessed areas and assessments (Exhibit C1, pp.68-76):

<b>Tax Roll #:</b> Valuation Group	<b>3924230</b>	<b>9943060</b>	<b>9943061</b>
"Retail"	4,575 Sq.Ft. \$1,420,000	43,290 Sq.Ft. \$8,654,500	27,256 Sq.Ft. \$5,774,000
"Shopping Centre"	4,712 Sq.Ft. \$1,778,000	47,318 Sq.Ft. \$9,220,000	28,247 Sq.Ft. \$8,004,500
<b>Variance</b>	+137 Sq.Ft. <b>+25.2%</b>	+4,028 Sq.Ft. <b>6.5%</b>	+ 991 Sq.Ft. <b>38.5%</b>

[11] The Respondent argues that the subject property is correctly and equitably assessed in relation to similar shopping centre properties, as an identical methodology was applied to determine the net leasable area of all properties in the Shopping Centre inventory.

[12] The Respondent confirms the Complainant's assertion that the assessment of the subject property is founded on the total net leasable area of the property, as determined from rent roll information received in response to requests for information made pursuant to section 295 of the *Municipal Government Act*.

[13] The Respondent submits that the properties stratified in the shopping centre valuation group are typically professionally managed, and as a result, relevant rent roll and financial information is almost always provided in response to the legislated requests for information. In contrast, the typically smaller properties in the Retail stratum are most often not professionally managed, and are frequently owner occupied; consequently the compliance rate to the legislated requests for information is low and the information supplied is frequently incomplete or inaccurate. The Respondent submits that as a result of the lack of adequate information for the Retail stratum of properties, a formula that estimates the net leasable area of Retail properties from the gross building area on record is employed, as set out below:

Main Floor	95% of Gross Floor Area
Upper Floors	90% of Gross Floor Area
Basement	90% of Gross Floor Area

[14] The Respondent argues that notwithstanding the differing methodologies employed to determine net leasable areas, the subject property is equitably assessed in relation to the properties valued by the Retail valuation group. The Respondent maintains that the formula employed by the Retail valuation group estimates the typical net leasable area of each Retail property in a mass appraisal approach, and the resulting assessments are founded on the total net leasable area; as are the properties stratified in the shopping centre valuation group.

[15] In response to the three duplicate 2012 assessments provided by the Complainant at pages 68-76 of exhibit C1, the Respondent concedes that the properties were undervalued for the 2012 taxation year as a result of being inadvertently transferred from the Shopping Centre inventory to the Retail inventory without updating the size of the properties to reflect their gross building areas. The Respondent submits that the three properties have since been returned to the Shopping Centre inventory for 2013, and the assessments are again properly founded on the total net leasable area.

## **Board Findings and Reasons**

[16] The Board finds that the subject property is equitably assessed in relation to similar properties in the Shopping Centre and Retail stratifications.

[17] The Board rejects the Complainant's argument that similar Retail properties are assessed at 95% of their actual value. Although the Complainant provided numerous examples of net leasable area variances, the Complainant failed to provide any market evidence to demonstrate that the resulting assessments of those (Retail) properties are below market value, and are therefore inequitable with the assessment of the subject property. Further, the Board is not persuaded that a discrepancy in one attribute of a property necessarily results in an assessment inequity.

[18] The Board further applies little weight to the Complainant's analysis, for the reason that twenty four of the Complainant's ninety two examples specify a gross building size that is exceeded by the indicated rent roll area; however, the Complainant conceded that he made no investigation, and offered no explanation of the anomaly.

## **Decision**

[19] The assessment is **reduced** from \$110,336,000 to **\$99,003,500**.

Heard October 7, 2013.

Dated this 8<sup>th</sup> day of November, 2013, at the City of Edmonton, Alberta.
