

Edmonton Composite Assessment Review Board

Citation: Altus Group v The City of Edmonton, 2013 ECARB 01145

Assessment Roll Number: 10098122
Municipal Address: 904 91 Street SW
Assessment Year: 2013
Assessment Type: Annual New

Between:

Altus Group

Complainant

and

The City of Edmonton, Assessment and Taxation Branch

Respondent

DECISION OF
Patricia Mowbrey, Presiding Officer
Jasbeer Singh, Board Member
Taras Luciw, Board Member

Procedural Matters

[1] When asked by the Presiding Officer, the parties did not object to the composition of the Board. The Board Members indicated there was no bias in the matter before them.

Preliminary Matters

[2] There were no preliminary issues before the Board.

Background

[3] The subject property is located at 9107 – Ellerslie Road SW, in Ellerslie Industrial neighbourhood and is known as ‘Market at Summerside’. It is classified as a neighbourhood shopping centre, was constructed circa 2008 and 2010. The City assessed area is 105,222 sq ft with a land size of 422,524 sq ft. The subject was assessed by the Income Approach to Value for the 2013 assessment of \$35,578,500.

[4] The Complainant has objected to the assessment on the grounds that similar properties are getting preferential treatment as they are assessed at 95% of their actual area and that the capitalization rate of 6.5% applied to the subject is too low.

Issue(s)

- [5] 1. Is the subject assessment equitable with assessments of similar properties?
- (a) Should the subject be given the 95% size adjustment?
2. Is the assessment capitalization rate of 6.5% too low?

Legislation

[6] *The Municipal Government Act, RSA 2000, c M-26, reads:*

s 1(1)(n) “market value” means the amount that a property, as defined in section 284(1)(r), might be expected to realize if it is sold on the open market by a willing seller to a willing buyer;

s 467(1) An assessment review board may, with respect to any matter referred to in section 460(5), make a change to an assessment roll or tax roll or decide that no change is required.

s 467(3) An assessment review board must not alter any assessment that is fair and equitable, taking into consideration

- (a) the valuation and other standards set out in the regulations,
- (b) the procedures set out in the regulations, and
- (c) the assessments of similar property or businesses in the same municipality.

[7] *The Matters Relating To Assessment and Taxation Regulation (MRAT), AR 220/2004 reads:*

Mass appraisal

2 An assessment of property based on market value

- (a) Must be prepared using mass appraisal,
- (b) Must be an estimate of the value of the fee simple estate in the property, and
- (c) Must reflect typical market conditions for properties similar to that property.

Position of the Complainant

[8] The Complainant presented written documentary evidence (Exhibit C-1, 91 pages), 95% Rental Area Analysis (C-2, 438 pages), Rebuttal document (C-3, 132 pages) and oral argument for the Board’s review and consideration.

Issue 1(a). Should the subject be given the 95% size adjustment?

[9] The position of the Complainant is that the assessment of the subject is not fair and equitable and is excessive. The Complainant argued that all retail properties should be assessed

using the same method, and that how large the assessment is or which assessor assesses the property, should not affect the assessment method.

[10] The complainant provided a Fairness and Equity Analysis of Rental Area (C-2), which listed 92 properties and included the City of Edmonton Request For Information rent rolls and Assessment Detail Reports on each property.

[11] The Complainant stated that the Respondent had categorized retail assessment in two groups, one used 100% of rent roll size for assessment purposes, and the other group used 95% of the leasable size (C-1, page 8). The Complainant argued that the subject property was treated inequitably because it was assessed using 100% of the rent roll area.

[12] The properties listed in C-2 indicated the ratio of the City Assessment Proforma sizes to the City Gross sizes which indicated the ratios had a median of 94% and an average of 92% overall. The chart also had a ratio of the City Assessment Proforma sizes to Rent Roll sizes which resulted in a median of 95%, and an average of 94%. The Complainant noted there was a close correlation between the two ratios to support a 95% adjustment.

[13] The Complainant provided the City's Assessment Record Valuation Summary and the Assessment Proforma for the subject which indicated the assessment area of the subject was 105,222 sq ft. The Complainant applied the 95% adjustment to the assessment area to reach 100,817 sq ft that was used in the requested assessment value of \$31,986,000, (C-1, pages 10, 12).

Issue 2. Is the assessment capitalization rate too low?

[14] The Complainant submitted that the 6.5% assessment capitalization rate was too low and stated that a capitalization rate of 7.0% was more appropriate, (C-1, page 9).

[15] The Complainant provided a Capitalization Rate Sales comparable chart of 24 sales, (C-1, page 15), with the respective supporting network data sheets. The sales produced an average capitalization rate of 7.15% and a median of 7.04%.

[16] The Complainant further submitted that of the 24 sales presented, 6 should be excluded, as they were invalid for various reasons; an 8 property portfolio sale, an old lease, leases with upside potential and an outlier, (C-1, page 15). Excluding the 6 sales, the average of the capitalization rates for the remaining sales was 7.24% and the median was 7.15% which the Complainant stated supported the requested 7.0% capitalization rate.

[17] The Complainant explained that the sales provided in the capitalization rate chart were sales within the last 2 years and was a true reflection of the market using actual net operating income and unadjusted sales prices which resulted in a leased fee capitalization rate of 7%.

[18] The Complainant requested a 2013 assessment of \$31,986,000, (C-1, page 13).

Complainant's Rebuttal

[19] The Complainant presented Rebuttal evidence (C-3, 132 pages).

[20] The Complainant identified the ten shopping centre sales from the chart of 24 capitalization rate sales, (C-1, page 15) and excluded the retail sales. The Complainant further

excluded two sales as one was encumbered with a 40 year lease at \$1 per year for a part of the property; and the second sale had not been listed on the open market. Analysis of the remaining eight shopping centre sales indicated a median capitalization rate of 7.14%, based on the Network document information. The corresponding median rate, provided by the City, based on a fee-simple NOI was 6.62% and, with a time adjusted sales price was 6.47%. (C-3, page 2).

[21] The Complainant submitted that the Respondent's capitalization rate analysis was flawed and provided Network Data sheets, Assessment Detail Reports, City of Edmonton Valuation Summaries and rent rolls to support the position.

Position of the Respondent

[22] The Respondent presented written evidence including an Assessment Brief and a Law and Legislation brief (Exhibit R-1, 201 pages) and oral argument for the Board's review and consideration.

Issue 1(a). Should the subject be given the 95% size adjustment?

[23] The Respondent submitted (R-1, pages 10-11), that there were two separate valuation groups for retail; one is for standard retail/retail plazas and the other is for shopping centres. The two groups are different as they each use a different approach to calculate size. The Respondent explained the reason for the different approaches; the standard retail group, which included owner occupied and small retail properties historically returned minimal responses to the City's Request For Information and consequently reliable size and other information was not available. Therefore the 95% of gross building area methodology was developed in an attempt to ascertain a correct and equitable gross leasable area of the standard retail properties for assessment purposes.

[24] The Respondent indicated that the RFI return rate for shopping centres was quite high, and the actual gross leasable area of properties can be ascertained for assessment purposes from the rent roll. The subject property is categorized as a shopping centre and was assessed using 100% of gross leasable area.

[25] The Respondent provided additional details (R-1 pages 13-15), to the Complainant's Rental Area Analysis of 92 properties presented in C-2. The Respondent added a column and noted the valuation group for each of the properties listed; all but 2 of the 92 properties were in the retail or retail plaza valuation group, which means they were assessed in the retail group using the 95% methodology. The subject is a neighborhood shopping centre and was valued at 100% of the gross leasable area. Therefore the Respondent pointed out that the Complainant's Rental Area Analysis properties were not comparable.

Issue 2. Is the assessment capitalization rate too low?

[26] In Exhibit R-1, page 22, the Respondent added a column for comments on the Complainant's capitalization rate sales comparables of 24 properties (C-1 page 15). The comments indicated that there were only 10 shopping centre sales listed. The Respondent included eight in the capitalization rate analysis (R-1, page 23). The other two shopping centre sales were considered invalid as: one consisted of a multiple parcel sale and the other was burdened with a 40 year lease at \$1 per year.

[27] The Respondent's City of Edmonton cap rate review (R-1, page 23), utilized eight shopping centre sales from the Complainant's chart of 24 sales comparables. For comparison, the Respondent listed the median cap rate of the eight sales comparables as follows:

- | | |
|--|-------|
| a. Actual NOI - not time adjusted sale price | 6.75% |
| b. Fee Simple NOI - not time adjusted sale price | 6.72% |
| c. Fee Simple NOI - time adjusted sale price | 6.47% |

The Respondent stated that the assessment capitalization rate of 6.5% was supported as it was based on a fee simple NOI and time adjusted sale price.

[28] The Respondent presented a Shopping Centre Capitalization Rate Analysis chart (R-1, page 26) of 14 properties, with supporting City sales analysis sheets. The sale dates were within 3 years of the valuation date and reflected 2013 time adjusted sales prices and 2013 assessed NOIs (which used typical lease rates of similar properties). The comparables reflected a fee simple capitalization rate that indicated a median of 6.18% and an average of 6.20%. The Respondent explained that legislation identifies fee simple estate value (MRAT s2), as the basis for assessment.

[29] The Respondent asserted that third party capitalization reports were included only for comparison and trending, and that the assessment capitalization rate was within the comparative ranges. The CBRE report indicated an Edmonton Neighborhood Retail capitalization rate of 6-6.50% (R-1, page 47), while the Colliers report indicated the Edmonton Community Retail capitalization rates ranged from 6.25%-6.75% (R-1, page 46).

Decision

[30] The decision of the Board is to confirm the subject property's 2013 assessment at \$35,578,500.

Reasons for the Decision

Issue 1(a). Should the subject be given the 95% size adjustment?

[31] The Board referred to s2 *MRAT*, that states, Mass Appraisal is the legislated methodology for assessment. The Board is of the opinion that the Income Approach to value is the appropriate valuation method.

[32] The Board accepted the premise of property stratification for the 2013 assessment (R-1, pages 172 -183), and that each property is further stratified showing similarities within the group. The subject is in the Neighborhood Shopping Centre group.

[33] The Board accepted the Respondent's explanation and reasons for the use of different approaches to determining the GLA of the two retail groups (i.e. retail and shopping centre). The Board is satisfied that there is ample information returned to the City in response to the annual RFI for the shopping centre group and that the gross leasable area can be ascertained for assessment purposes from the rent roll. The Board accepted that there are minimal responses to the annual RFI for the retail group and that the 95% of gross building area was developed in an attempt to ascertain correct and equitable gross leasable area for assessment purposes.

[34] The Board reviewed the extensive list of 92 comparable properties presented by the Complainant in the Fairness and Equity Analysis of Rental Area (C-2). However, the Board was not persuaded by the Complainant's argument and submission that the shopping centre group of properties was not treated fairly and equitably. The Board did not accept the premise that the 95% method of calculating size should be applied to both groups of retail properties.

[35] The Board accepted the Respondent's grouping of retail and shopping centre properties for assessment purposes, and therefore finds the comparables inappropriate as they are a dissimilar grouping to the subject.

Issue 2. Is the assessment capitalization rate too low?

[36] The Board finds that the Complainant has not provided sufficient evidence to demonstrate that the 6.5% capitalization rate used to prepare the subject assessment is incorrect or inequitable.

[37] The Board noted that of the Complainant's 24 sales comparables (C-1, page 15), 14 were categorized as Retail Plaza or General Retail and were dissimilar to the subject; and 10 were shopping centres which were considered unreliable as the capitalization rates were lease fee rates derived using actual NOI rather than a stabilized NOI.

[38] The Board gave greater weight to the Respondent's capitalization rate review of the eight sales (R-1, page 23), which were included in the Complainant's shopping centre comparable chart, which indicated a fee simple capitalization rate of 6.47%. The Respondent's Shopping Centre Capitalization Rate Analysis (R-1, page 26) of 14 sales comparables indicated an average of 6.20% and a median of 6.18%, which also supported the assessment capitalization rate of 6.50%.

[39] The Board accepted the Respondent's method of calculating a capitalization rate which met the legislative requirement of determining a fee simple capitalization rate. The Respondent derived the capitalization rate using typical market conditions and applied this fee simple capitalization rate to a typical NOI in the assessment of a property. The capitalization rate was applied in the same manner as it was derived.

[40] The Board finds that the Respondent's 6.5% capitalization rate is supported by the Respondent's Shopping Centre Capitalization Rate Analysis (R-1, page 26) and is an appropriate rate to value the subject property.

[41] The Board finds the subject's 2013 assessment of \$35,578,500 is correct, fair and equitable.

Dissenting Opinion

[42] There was no dissenting opinion.

Heard on August 28, 2013.

Dated this 20th day of September, 2013, at the City of Edmonton, Alberta.
